ACADEMIC PROJECT

Project Name: Smart Road Accident Detection & Communication System

Description : We are developed a system in such a way that when the accident occurs, the heart rate sensor will determine the heart rate of the driver and along with the current location the

heart rate information is also sent. The system sends the message to the stored emergency numbers successfully when the car is collided and toppled or tilted by more than 30 degrees and if the reset button is not pressed in the stipulated time interval.

Hobbies: Reading, Cricket, Movies, Music
